Art Unit: 2827

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 1, 3, 5-8, 10, 12, 14, 16-18 and 20 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 4, 10, 14 and 18 of prior U.S. Patent No. 6,265,775. This is a double patenting rejection.

To further clarify, although some of the instant claims are differently worded than claims of the prior patent, they define the same invention. Specifically, the instant claims recite, "a first semiconductor die," and, "a second semiconductor die," both comprising a flip chip, where the prior patent recites, "a first substrate," and, "a second substrate," respectively. However, the instant claims define the same invention as the prior patent claims because the semiconductor die limitations are inherent properties of a flip chip. Indeed, applicant admits that a flip chip is a semiconductor die in the specification at paragraph [0003]. The remaining grammar of the

Art Unit: 2827

claims of the prior patent differs slightly from that of the instant claims, but the differences are not semantically significant, and the scope of the instant claims is the same as the scope of the prior patent claims.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-20 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of U.S. Patent No. 6,265,775 in combination with Bertin (5270261).

To further clarify, although some of the instant claims are differently worded than claims of the prior patent, the instant claims are obvious over the combination of 6,265,775 and Bertin.

Specifically, the instant claims recite, "a first semiconductor die," and, "a second semiconductor die," where the

Art Unit: 2827

prior patent recites, "a first substrate," and, "a second substrate," respectively. However, at column 5, lines 2-9, Bertin teaches a first semiconductor die substrate 50 and a second semiconductor die substrate ["integrated circuit chip"]. Moreover, it would have been obvious to combine the product of Bertin with the product of 6,265,775 because it would provide a first and a second substrate.
